Energy Cost Reduction

The energy consumption of a heating system contributes greatly to overall operating costs. It can therefore be a rewarding procedure to highlight possible reductions through this heating cost check analysis.

As a user of a Schwank heating system that currently comprises 600 or 2000 series heaters you will know about the **quality** of Schwank products. The energy and cost savings available by upgrading your existing system to **modern** type supraSchwank heaters is significant. The gas input can be reduced by up to 50% so that a payback can be reached in a short time

Input requirement

ECONOMICAL

today

supraSchwank

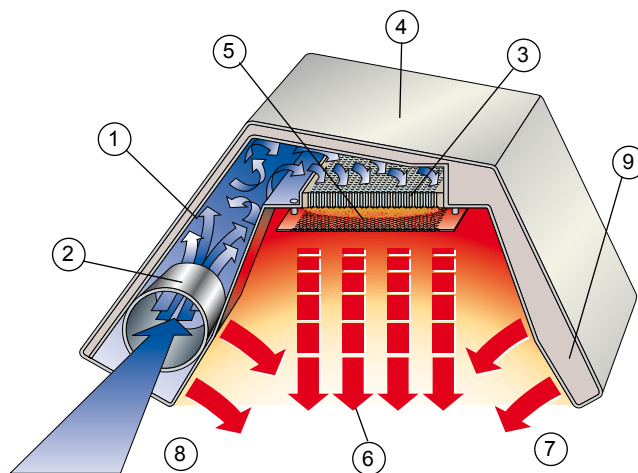

The supraSchwank saves cash

The supraSchwank range of heaters represent the very best of luminous heaters.

- 1 In-flow of the gas-air mixture into the patented Delta mixing chamber
- 2 Mixing tube
- 3 Ceramic tile
- 4 Outer housing
- 5 High temperature radiation grid
- 6 Direct radiation
- 7 + 8 Combined radiation via reflectors
- 9 Fully insulated

Due to its superior technology you can avoid heating losses and because of this a reduction of gas input by up to 50%, ensuring a constant heat level.

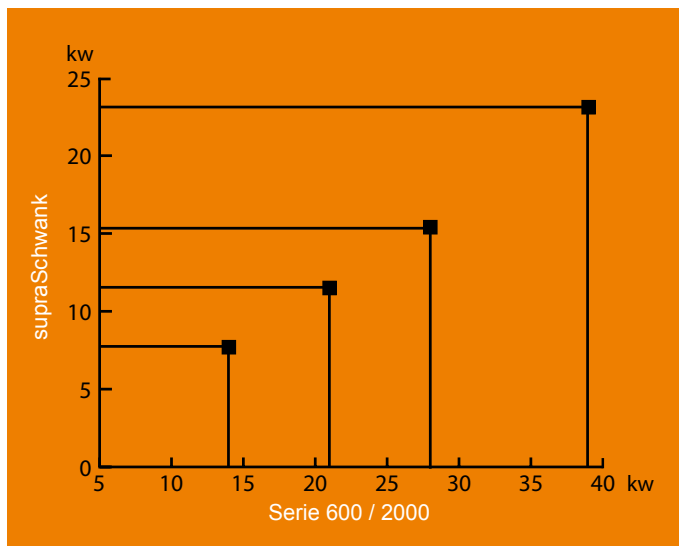

Make the change – it will benefit you!

Input values for 600/2000 series compared to supraSchwank

600er/2000er	supraSchwank
14kW	7,7kW
21kW	11,5kW
28kW	15,4kW
39kW	23,1kW

Explanation: A 21kw heater from the 600/2000 series is equivalent to an 11.5kw heater from the supraSchwank. A reduction of 45% (21kw/11.5kw).

A strong brand - your advantages

- Worldwide market leader
- Inventor of gas infra red heating
- 75 years of experience
- Neutral comparison of different heating systems
- Installation, commissioning and service
- Quality products ‚Made in Germany‘

We support you with:

- Project advice
- Energy cost comparison
- Planning and design
- Full detailed proposals
- Project financing
- Installation
- Commissioning
- Service
