HAVERLAND®

Air and surface purifier

Pure Air Box

Full elimination of microorganisms.

ActivePure® TECHNOLOGY

EASY CONTROL

ECO-FRIENDLY

PROGRAMMABLE

SILENT

REMOTE CONTROL

Disinfects and purifies the air you breathe and the surfaces you touch 24/7!

Exclusive PCO™ technology.

HAVERLAND IS A SPANISH BRAND

Pure Air Box

Always clean and fresh air.

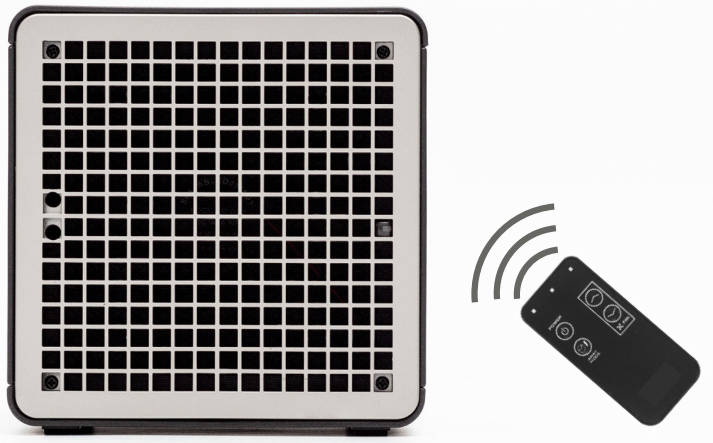
Pure Air Box is a compact and surprisingly powerful device that eliminates odors and all kind of microorganisms.

PCO™ technology eliminates surface viruses, bacteria and germs up to 99,99%. It is non-toxic and does not use chemical products such as sprays or liquids, therefore it can be used in the presence of people and pets.

Designed to disinfect and purify any space (houses, offices, shops, etc) **for 24 hours, 7 days a week.** It is eco-friendly, easy maintenance and with very low electricity consumption.

Purifies and disinfects thanks to its combined operation of PCO™ technology and photocatalytic oxidation and ionization (ionizes - deodorized - disinfects and oxygenates the area where its used).

Stylish, small, light and portable.



- Eliminates bacteria, viruses and all kind of microorganisms.
- Eliminates fungi and odors.
- Eliminates air impurities.
- Relieves allergy symptoms such as coughing, sneezing, and itchy or watery eyes.
- No installation needed, just plug it in to start working.

* The use of this appliance is not an alternative to any medical treatment.

PCO™ 24/7 + Ozone technologies.

The most complete and effective system for deodorization, disinfection and air purification and surfaces indoors thanks to both **PCO™ and Ozone technologies.**

- **PCO™ technology (Photocatalytic oxidation):**

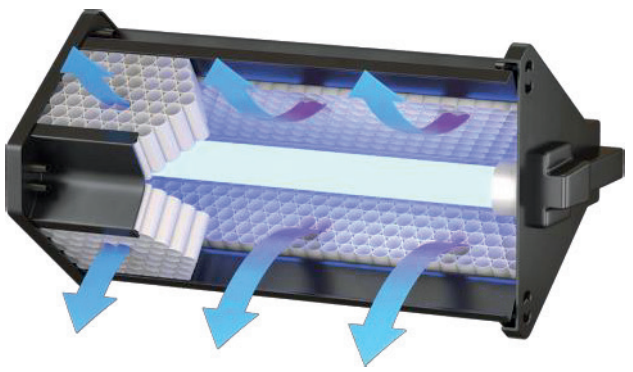
For areas with continuous presence of people:
Combines the action of UV light, hydroxyl radicals and ionization.

- **UV Light:** Ultraviolet light causes microorganisms exposed to their wavelengths to be incapable of reproducing, infecting living beings and generating bad odors.

- **Hydroxyl radicals:** They are formed from UV light and humidity in the environment. They deodorize and clean indoor air by oxidizing nearby pollutants, breaking them down into water and CO_2.

- **Ionization:** Negative ions that are in the environment attract positively charged particles such as dust, pollen, mold and pathogenic microorganisms. Thus, the polluting particles weigh too much and fall to the ground, making it difficult to inhale thus creating cleaner and fresher environment.

Suitable for homes, offices, hotel rooms, schools, veterinary clinics, sports facilities, shops, businesses, etc.

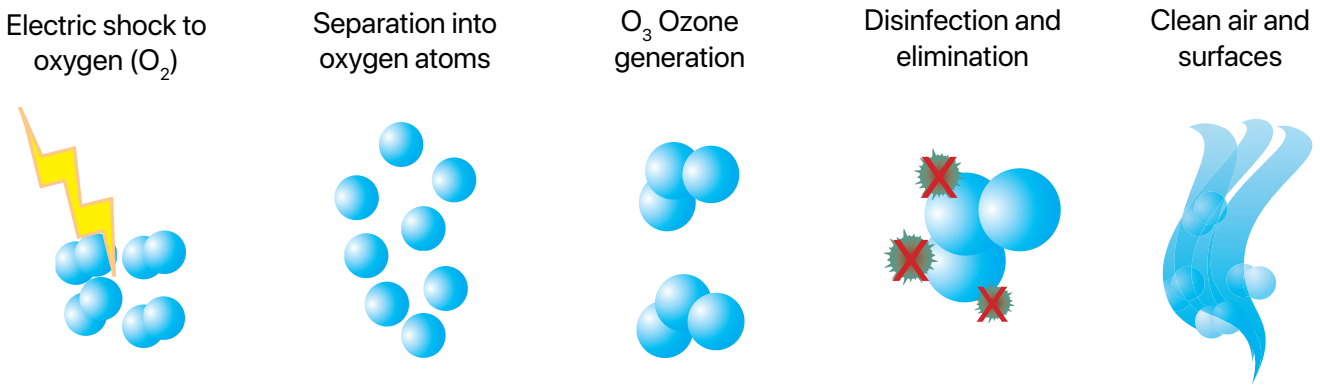


Patented design

- **"Away" Mode.**

For spaces <u>WITHOUT the presence of people</u>:
Ozone is a molecule of 3 oxygen atoms (O_3) that is generated by the electrical activation of oxygen (O_2).
It is the most powerful natural disinfectant. Eliminates contaminating particles and microorganisms in the air, on surfaces and fluids. The ozone generating lamp has a production capacity of 360 mg / hour.

DISINFECTION AND ELIMINATION PROCESS



Where to use ozone?
The areas where ozone is really effective are interior spaces, where people meet and the air is not constantly renewed, accumulating both organic matter remains and pathogens that feed on them causing bad odors and spreading diseases.

The result of correct ozonation is both disinfection and purification of the air and surfaces of the treated areas, as well as the elimination of bad odors and creating a clean, sanitized and healthy environment.

A safe and eco-friendly solution.
Ozone does not produce residues or waste during treatment,since it is an unstable gas molecule that tends to return to its original state in a few minutes; oxygen (O_2). It is a natural and environmentally friendly solution for the well-being of people and animals.

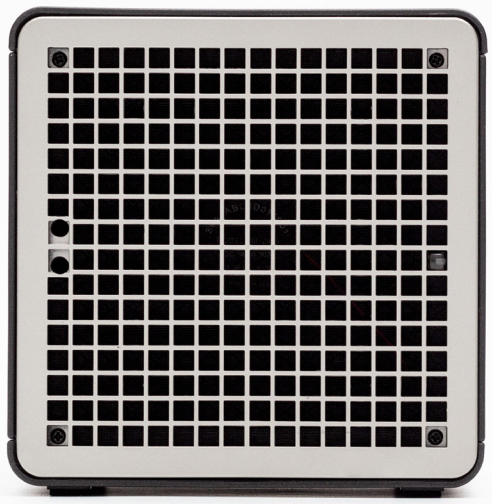
Environmental well-being.

- Air Flow: 1,61 m/s
- Power: 21 W
- Suitable for rooms up to: 140 m^2
- Eliminates viruses in air and surfaces.
- UV PCO cell: 9000 h
- Ozone plate: 9000 h
- Photocatalytic oxidation.
- Elimination of viruses, bacteria and microbes.
- 3 ventilation speeds.
- Sound level: 12 dB / 17 dB / 25 dB
- 2 working modes : Normal and "Away" (2 hours)
- Programmable timer: "Away" mode (2 hours)
- Dimensions (L x W x D): 165 x 165 x 178 mm
- Weight: 1.36 Kg
- EAN code: 8423055007541

All in 4 buttons.

• **Normal mode:**
Disinfects and purifies the air you breathe and the surfaces you touch 24/7! It uses PCO™ technology to produce low levels of natural oxidants and superoxide ions for daily use with people and animals indoors. 3 speeds available.

• **"Away" mode with 2-hour timer or continuous operation:**
It generates Ozone O_3 in unoccupied spaces of up to 140 m^2 during 2 hours or continuous operation.



* Ask your distributor for spare parts.

Pure Air Box

Designed to disinfect and purify the air you breathe.

The perfect choice. Disinfect and purify spaces in 5 minutes, **for 24 hours, 7 days a week,** in an eco-friendly way, with minimal maintentance and electrical consumption.
