

FLUE SYSTEMS

AIR / FLUE GAS CONNECTION FOR AIRTIGHT, PRESSURISED BOILERS

- Classification and selection p. 2 and 3
- Regulations and recommendations p. 3 and 4
- The various configurations applied to De Dietrich boilers p. 6 to 91
- List and use scenarios of all flue systems accessories available p. 92 to 105

Vertical forced flue configuration

Horizontal forced flue configuration

Flue systems accessories

The flue systems that we sell have CE marking

This "FLUE SYSTEMS" brochure contains all of the technical and statutory information regarding the air inlet and flue gas evacuation conduits used in DE DIETRICH forced flue boilers:

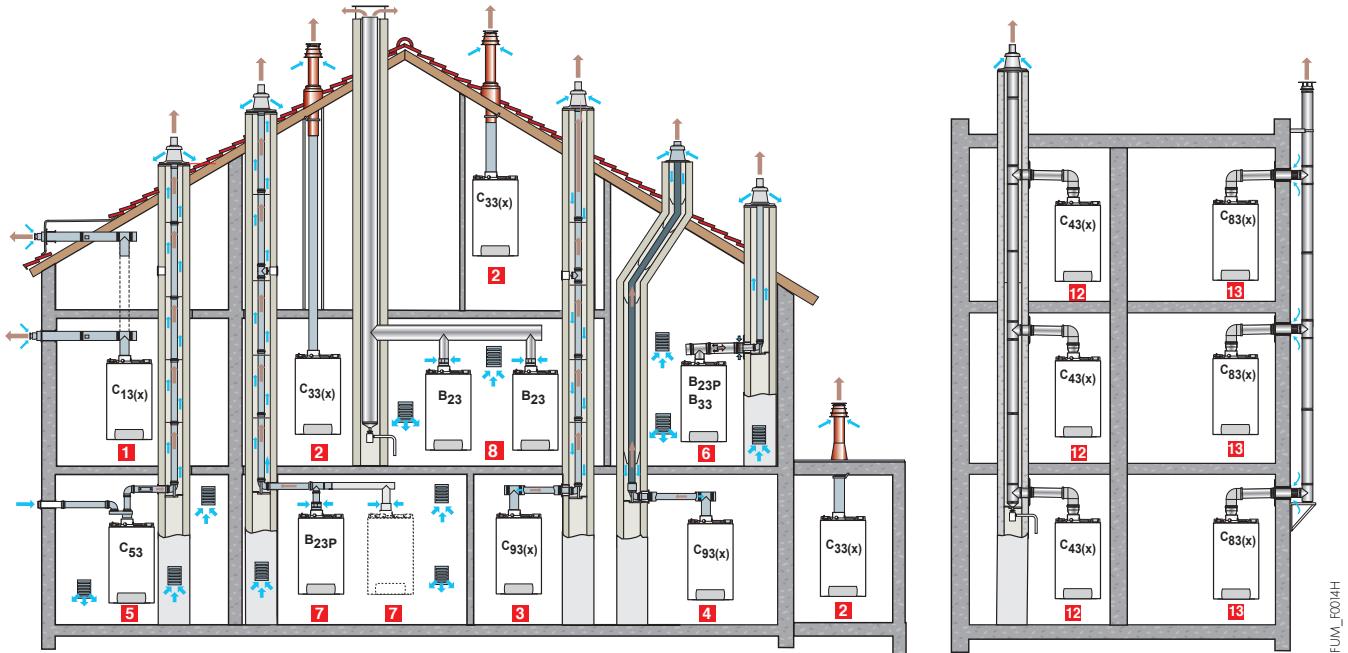

- Type B: chimney connection
- Type C: forced flue connection

Depending on the **configuration selected on page 2**, its design makes it easier to come to a decision on the various accessories needed for the air/flue gas connection of the concerned De Dietrich boilers.

The **table on page 3 indicates which page to refer to per type of boiler and type of configuration**; on each of these pages, the accessories are listed by package no. and reference and are illustrated by dimensional diagrams.

A table at the end of the brochure summarises all of the flue systems accessories available, listed by package no., along with the situations in which they should be applied.

CLASSIFICATION AND SELECTION

| Types | Classification | Air/flue gas pipe types | Particularity | Observations |
|-------|--|---|---------------------------------------|---|
| 1 | C _{12(x)} C _{13(x)} | concentric | horizontal terminal | wall outlet |
| 2 | C _{32(x)} C _{33(x)} | concentric | vertical terminal | roof outlet |
| 3 | C _{92(x)} C _{93(x)} (1) | - concentric in boiler premises or boiler room - single in chimney flue | rigid pipes | combustive air in counter-current in the chimney flue |
| 4 | C _{92(x)} C _{93(x)} (1) | - concentric in boiler premises or boiler room - single in chimney flue | | |
| 5 | C ₅₂ C ₅₃ | single separate | bi-flow adapter | separate pipes |
| 6 | B _{22p} /B ₃₂ B _{23p} /B ₃₃ | single in pressurised chimney flue | flex and/or rigid pipes | combustive air taken in through an opening on the wall of the boiler premises |
| 7 | B _{22p} B _{23p} | single in pressurised chimney flue | cascade installation | |
| 8 | B ₂₂ B ₂₃ | single in chimney flue under vacuum | single boiler or cascade installation | |
| 12 | C _{42(x)} C _{43(x)} | - collective concentric in the chimney flue - concentric in boiler premises/boiler room | rigid pipes | shared flue system |
| 13 | C _{82(x)} C _{83(x)} | - collective single insulated on the outside - concentric in boiler premises/boiler room | rigid pipes | shared flue system |

(1) C_{93(x)}: formerly C_{33(x)}

Details: - the letter "x" means that all of the components carrying pressurised flue gases come not into direct contact with the ambient air in the premises.

- the difference between classifications C..2 and C..3 lies solely in the position of the forced flue fan in relation to the combustion chamber (C..2: located downstream; C..3: located upstream).

* **Homologation regarding type C boilers:**

In accordance with the prevailing Standards applicable to type C1.., C3.., C9 and C5.. gas and oil boilers, these must be installed with their approved combustive air inlet and combustion product evacuation conduits and the appropriate terminals

** In overpressure shared flue configuration, the boiler must be fitted with a flue gas damper homologated with the boiler:

- fitted as standard to NANEO, MODULENS G®, TWINEO, INNOVENS and INNOVENS PRO boilers
- optional for VIVADENS and C 230 ECO boilers

(I) For the hybrid heat pumps: refer to the instructions of the boilers which they are associated:

- MODULENS G® for HP INVERTER G Hybrid,
- NANEO for ALEZIO G Hybrid,
- NeOvo Condens/EcoNox for ALEZIO O Hybrid.

RECOMMENDATIONS AND REGULATIONS

Installations must be carried out in compliance with prevailing local and national regulations.

INFORMATION SPECIFIC TO THE FLEXIBLE OUTLET PIPE IN PPs

- PPs: Polypropylene
- colour: white
- appearance: flexible (flex PPs)

Concerns types **4** **6** and the "flex conduit" packages:
 DY897 (\varnothing 80 mm, L 12.5 m) and DY896 (\varnothing 80, L 50 m),
 DY889 (\varnothing 110 mm, L 15 m) and DY890 (\varnothing 110 mm, L 25 m).

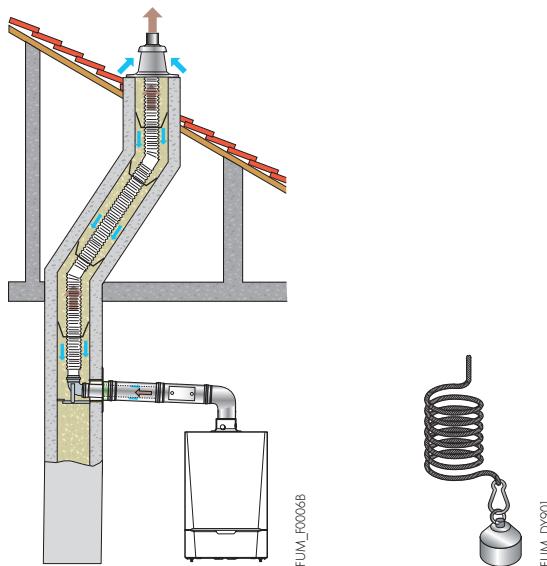

Assembly and commissioning must be done by a qualified professional who will take care of installation and connection according to the codes of practice and prevailing standards and regulations.

Important recommendations:

- The flexible conduit must be mounted in suspension. The hanging system is incorporated in the terminal
- Assembly starts at the top, using an insertion tool: package DY901 (\varnothing 80 mm) or DY894 (\varnothing 110 m)
- Do not use the flexible conduit for horizontal applications
- Have the shaft/chimney checked and/or cleaned by a company qualified in flue systems.

Assembly tips:

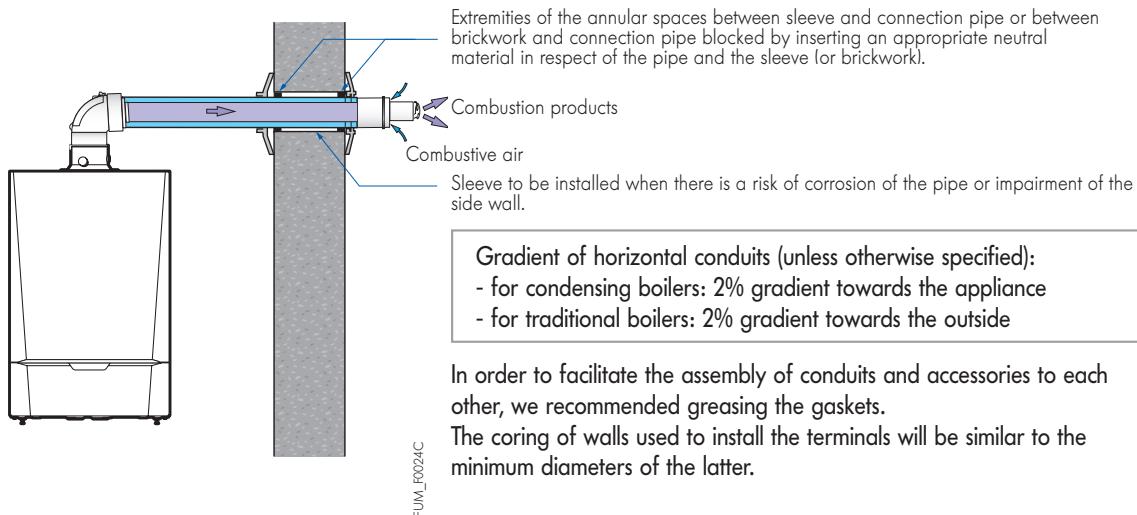

- The centring systems must be mounted on the flexible conduit at least every 2 m and before and after each straight inspection pipe.
- If the chimney sweep so requests, a straight inspection pipe can be fitted. This part is used to check and/or clean the flexible conduit from the inside. Follow the sign marked on the straight inspection pipe during assembly in order to prevent incorrect assembly which may lead to leakage

- The coupling parts are used to connect the lengths of flexible conduit to each other. Follow the direction of installation so that any condensation can be discharged at the bottom.
- The insertion tool is designed for easy, straightforward mounting of the flexible conduit. It can be used to pull the flexible conduit from the top and in the other direction.

PRACTICAL TIPS

| Description | measurement to be applied | concerns |
|----------------------|--|---|
| Wall bushing | in sleeve if direct contact | plaster/steel - plaster/aluminium - polystyrene/conduits |
| Annular space | blocked using neutral material | at the extremities, between sleeve and conduits or between wall and conduits |
| Bushing | not encased, engraved, coated, sealed or blocked | incorporation of conduits in structural components |
| Secured | using clamps close to and above the interlocking elements | securing conduits to structural components |
| Assembly | fittings mounted with the female components pointing upwards | parts of interlocking conduits (fitting or gasket ex floor bushing) |
| Tightness | done using mechanical means (excluding pastes, glues or adhesives) | assembly of conduits and detachable parts |
| Fire safety distance | none | N/A |
| Protection | against mechanical shock by cladding | concentric conduits passing through a habitable room other than the installation premises |
| Condensates | Condensates neutralisation | for outputs > 2000 kW unless a local Prefectoral Order is in place |
| Cutting conduits | clean, burred cut using appropriate tools | for straight lengths and horizontal terminals |

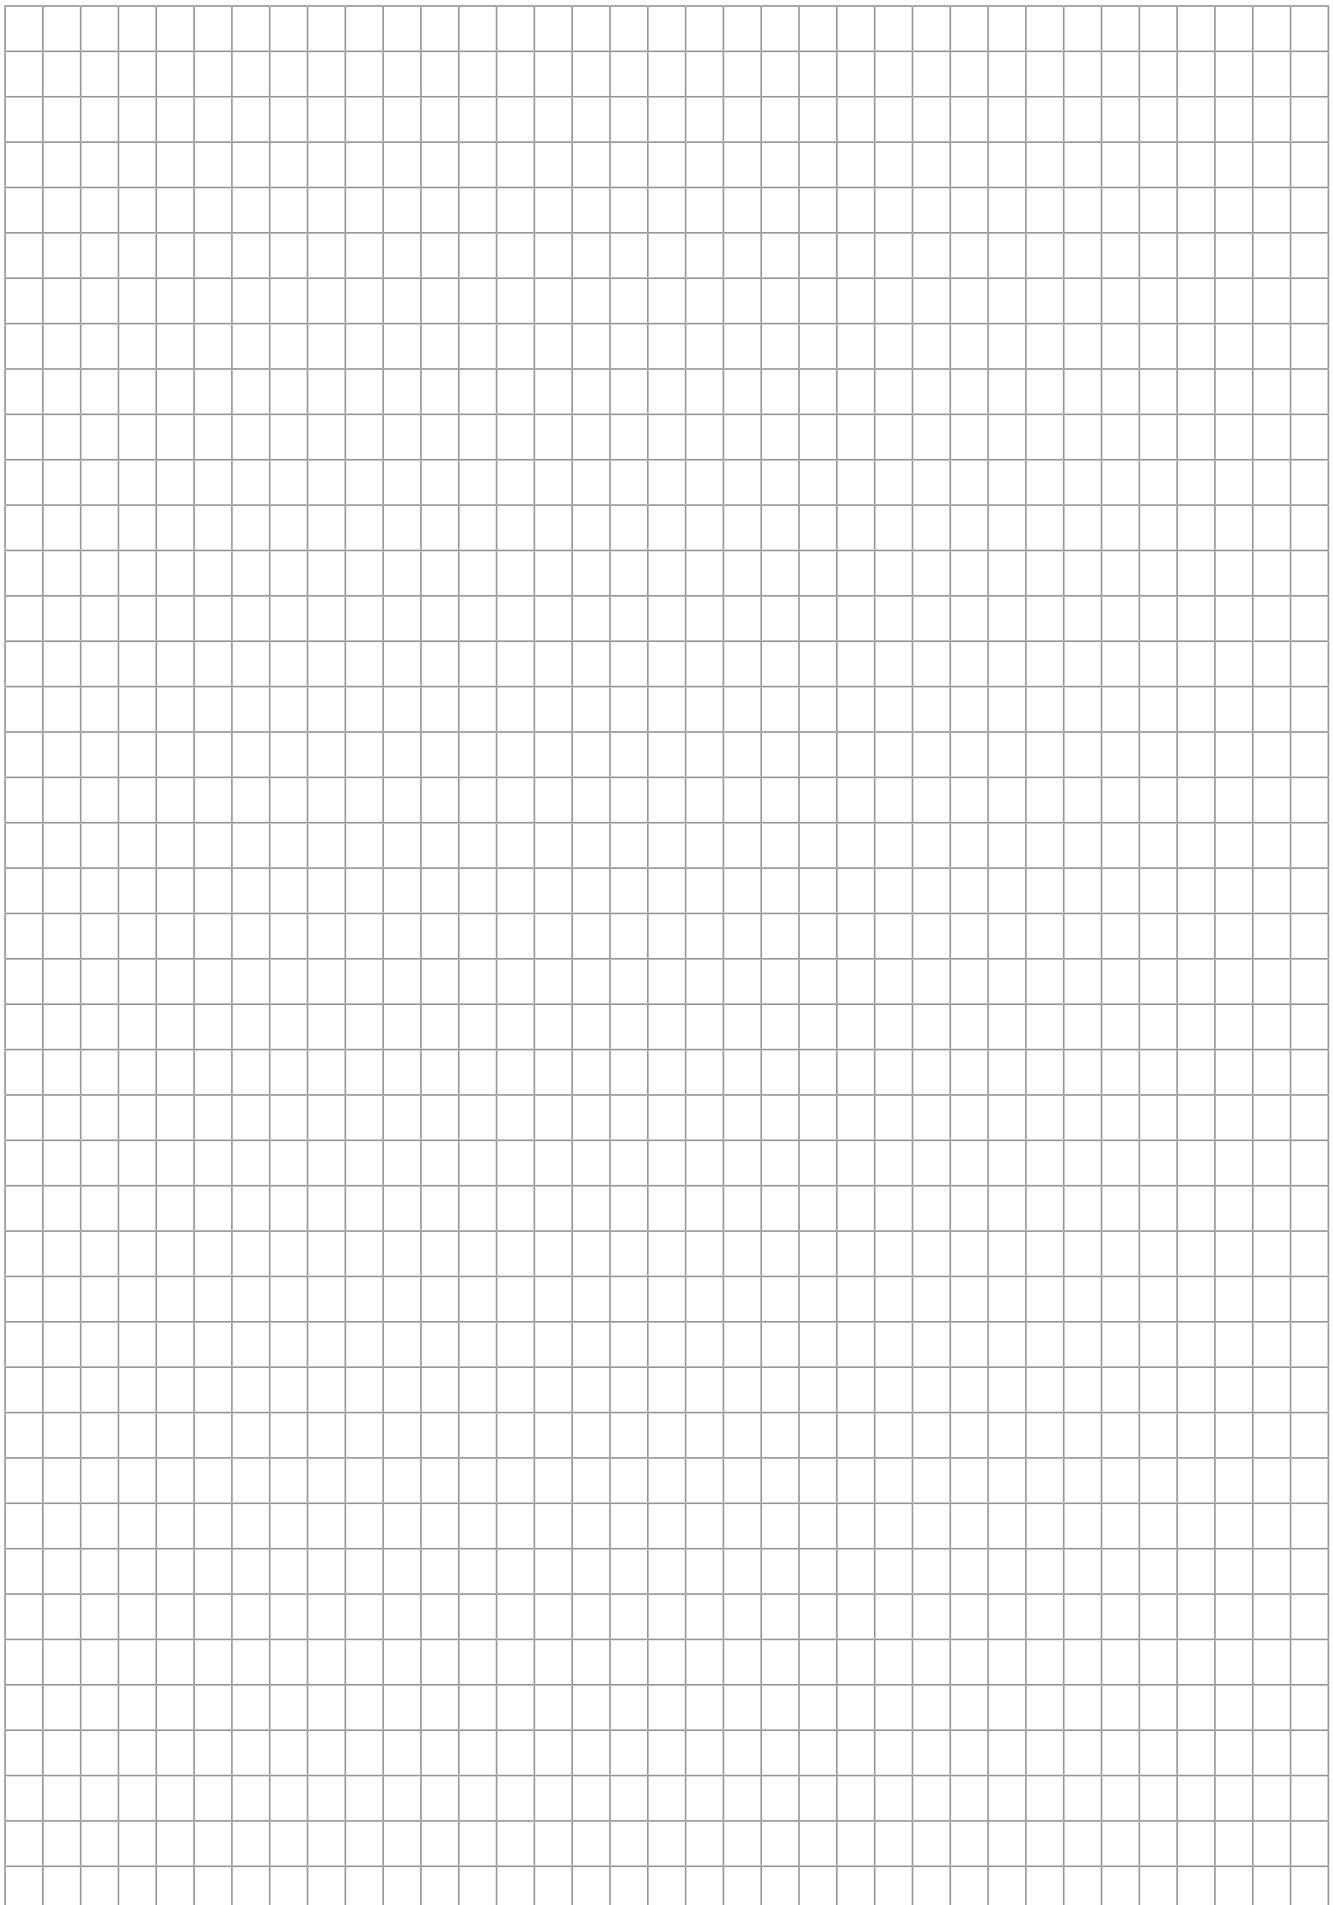

In order to facilitate the assembly of conduits and accessories to each other, we recommended greasing the gaskets.

The coring of walls used to install the terminals will be similar to the minimum diameters of the latter.

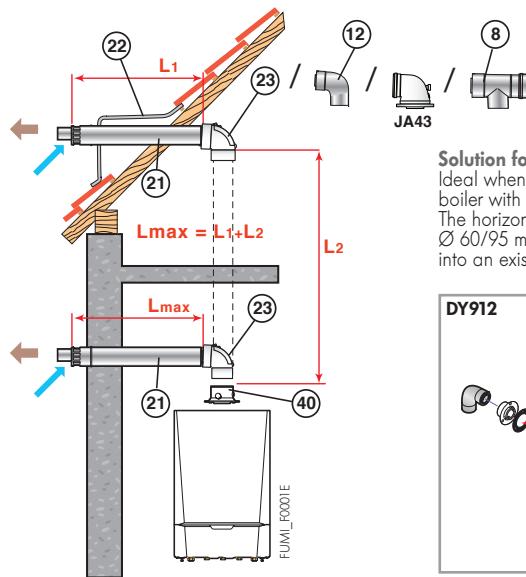

The dimensions shown in this brochure are given in mm to an accuracy of + or - 5 mm and may be modified.

NOTES

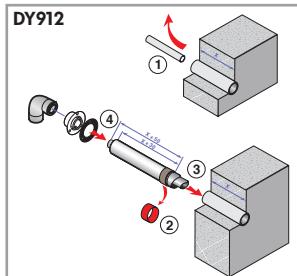

MODULENS G®, TWINEO, INNOVENS

1 CONFIGURATION C13X - CONCENTRIC HORIZONTAL FORCED FLUE ALU/PPs (CONNECTION TO AN EXTERNAL WALL OR A ROOF OUTLET)

Boiler shown: MCA connected to the horizontal forced flue Ø 80/125 mm (package DY882) + Adapter Ø 80/125 mm (package HR38)

Solution for renovation project:
Ideal when replacing an existing boiler with a condensing boiler. The horizontal "Retrofit" forced flue Ø 60/95 mm (DY912) can be inserted into an existing Ø 100 mm conduit.

| Boiler types | connect. Ø (mm) | Lmax (m) | |
|--|-----------------|----------|--|
| | 60/100 | 80/125 | |
| INNOVENS MCA 10 | 4.1 | 8.0 | |

1 CONFIGURATION C13X - CONCENTRIC HORIZONTAL FORCED FLUE ALU/PPs (CONNECTION TO AN EXTERNAL WALL OR A ROOF OUTLET)

Solution for renovation project:
Ideal when replacing an existing boiler with a condensing boiler.
The horizontal "Retrofit" forced flue Ø 60/95 mm (DY912) can be inserted into an existing Ø 100 mm conduit.

| Ø connect. (mm) | Lmax (m) | |

12 CONFIGURATION C_{43X} - CONNECTING A FORCED FLUE BOILER TO A SHARED FLUE SYSTEM

To size such a system, contact the flue system supplier

Note:

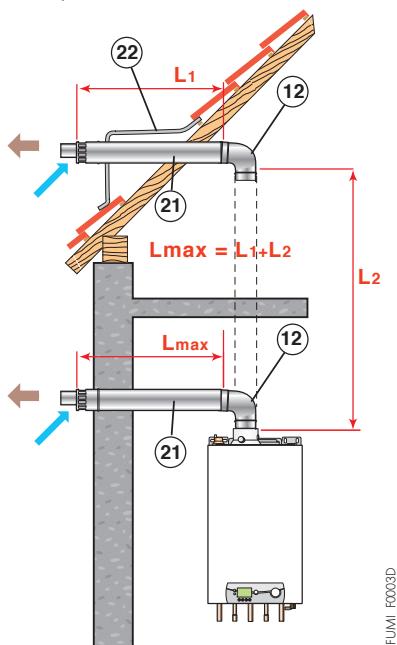

It is possible to put boilers with differing outputs on the same conduit, consult the conduit manufacturer.

⇒ Alu/PPs flue systems accessories needed at the very least for connection to a collective conduit

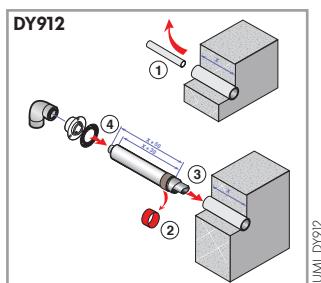

| Description | Diagrams with Dimensions/References | Boiler types | MPX |
|---|-------------------------------------|------------------|-----|
| | | Package/Ref. | |
| Boiler connection kit on a shared flue system with adapter Ø 60/100 sur Ø 80/125 mm | | HX103 7671879 | X |

⇒ Other flue systems accessories available, see pages 92 (Alu/PPs)

1 CONFIGURATION C13X - CONCENTRIC HORIZONTAL FORCED FLUE ALU/PPS (CONNECTION TO AN EXTERNAL WALL OR A ROOF OUTLET)

Solution for renovation project:
Ideal when replacing an existing boiler with a condensing boiler.
The horizontal "Retrofit" forced flue Ø 60/95 mm (DY912) can be inserted into an existing Ø 100 mm conduit.

Boiler shown:
MCR-P connected to the horizontal forced flue Ø 60/100 mm
(package DY871)

| Boiler types | connect. Ø (mm) | Lmax (m) |

12 CONFIGURATION C43X - CONNECTING A FORCED FLUE BOILER TO A SHARED FLUE SYSTEM

To size such a system, contact the flue system supplier

Note: it is possible to put boilers with differing outputs on the same conduit, consult the conduit manufacturer.

⇒ Examples of 3 a shared flue system sizing - inside the building

| Number of gas appliances connectable | | | |
|--------------------------------------|--|--------------------------------|----|
| Boiler types | Ø of the collective conduit (mm) (internal/external) | Number of appliances per level | |
| | | 1 | 2 |
| MCR-P 24 PLUS | 130/200 | 5 | 6 |
| | 180/250 | 8 | 10 |
| | 230/350 | 17 | 20 |
| MCR-P 24/28 MI PLUS | 130/200 | 6 | 6 |
| | 180/250 | 8 | 10 |
| | 250/350 | 18 | 20 |
| MCR-P 30/35 MI PLUS | 130/200 | 4 | 4 |
| | 180/250 | 7 | 8 |
| | 230/350 | 15 | 16 |
| MCR-P 34/39 MI PLUS | 130/200 | 4 | 4 |
| | 180/250 | 8 | 8 |
| | 250/350 | 15 | 14 |

Example: For 10 identical MCR-P 24/28 MI PLUS boilers with a burner output of 24 kW, pressure at the boiler nozzle of 100 Pa, in a 5-storey building, it is possible to install a conduit with an internal diameter of 180 mm and an external diameter of 250 mm.

⇒ Examples of 3 a shared flue system sizing - outside the building

| Number of gas appliances connectable | | | | |
|--------------------------------------|---------------------|-----|-----|-----|
| Internal diameter of the conduit | 130 | 150 | 180 | 250 |
| External diameter of the conduit | 194 | 214 | 244 | 314 |
| Boiler types | MCR-P 24 PLUS | 7 | 9 | 14 |
| | MCR-P 24/28 MI PLUS | 7 | 9 | 14 |
| | MCR-P 30/35 MI PLUS | 5 | 7 | 11 |
| | MCR-P 34/39 MI PLUS | 6 | 8 | 12 |

Example: For 6 identical MCR-P 24/28 MI PLUS boilers with a burner output of 24 kW, pressure at the boiler nozzle of 100 Pa, in a 6-storey building, it is possible to install a conduit with an internal diameter of 130 mm and an external diameter of 194 mm.

Calculations have been made according to the EN 15287 standard with:
2.7 metres floor height.
2 metres of Ø 80/125 mm connection pipe and two 90° elbows.
Shared flue system with no deviation

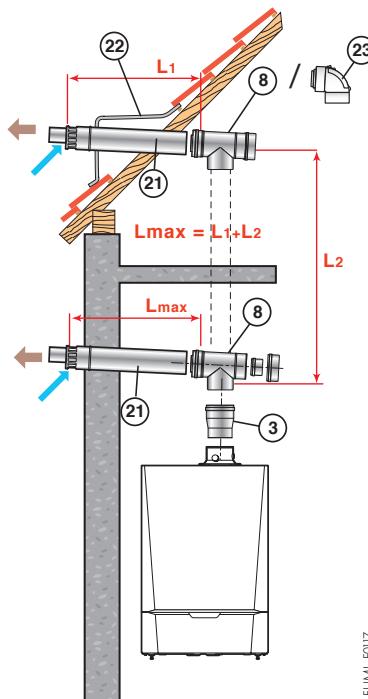

⇒ Alu/PPs flue systems accessories needed **at the very least** for connection to a collective conduit

INNOVENS PRO MCA 45 TO 115 ONLY

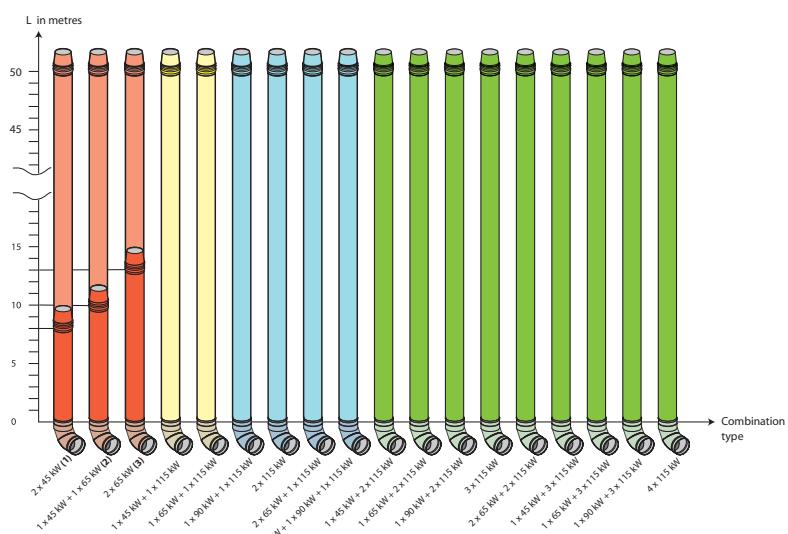

7 CONFIGURATION B23P - CONNECTION TO A CHIMNEY FOR CASCADE INSTALLATION

MCA_F0075

Maximum admissible length L in m depending on the Ø of conduit D (in mm) for various "cascade" combinations

- "Cascade" combinations with boilers in wall-hung or floor-standing alignment

Key

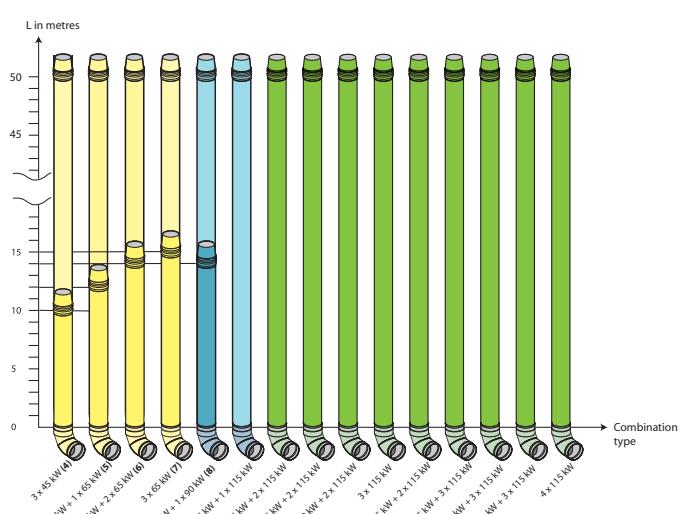

| | | | | | | |
|--------------------|-----------------------------|----------------|-----------------------------|----------------|-----------------------------|-------------------|
| D = Ø150 Tubing | Ø150 Outside assembly | Ø180 Tubing | Ø180 Outside assembly | Ø200 Tubing | Ø200 Outside assembly | Ø250 mm Tubing |
|--------------------|-----------------------------|----------------|-----------------------------|----------------|-----------------------------|-------------------|

NB: in the case of conduits to the outside, the maximum height possible to guarantee operation is:

- (1): 7.90 m (2): 10.20 m (3): 13.10 m (4): 9.80 m
- (5): 11.70 m (6): 14.00 m (7): 16.40 m (8): 14.30 m

MC35E_F0082

- "Cascade" combinations with boilers fitted back to back

- INNOVENS PRO MCA 45/65/90/115 boilers, operating at 80/60 °C
- Overpressure on boiler outlet less than 50 Pa

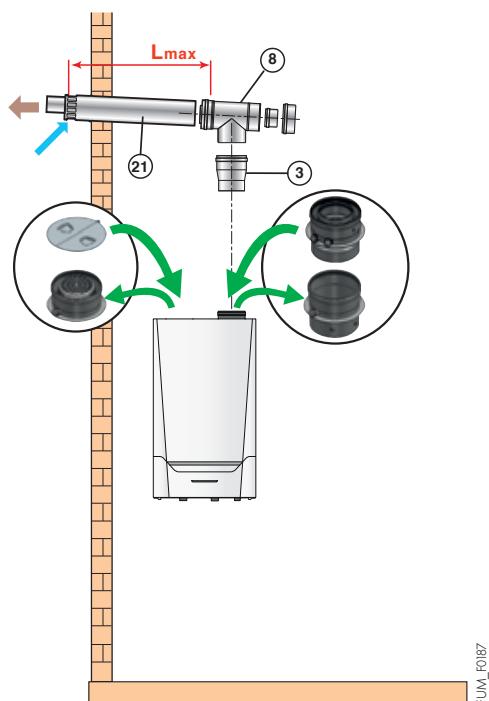

Note: These lengths are given as a guide. De Dietrich's liability may in no event be invoked.
For configurations of different assemblies, please consult us for a specific calculation.

NEOVO CONDENS

6 CONFIGURATION B23P - CONNECTION TO A CHIMNEY USING PPs PIPES IN BOILER ROOM, SINGLE "RIGID" OR "FLEX" PPs PIPES IN CHIMNEY (COMBUSTIVE AIR TAKEN FROM THE BOILER ROOM)

(I) For each additional metre of horizontal conduit, remove 1.2 m from the vertical length Lmax given in the table above.

| Boiler types | \varnothing connect (mm) | Lmax (m) | | | |
|-----------------------|----------------------------|----------|---------|-----------|----------|
| | | 80 rigid | 80 flex | 110 rigid | 110 flex |
| EFU C 19 to 32 | | 15 | 15 | - | - |
| EFU C E 19 to 32 | | 15 | 15 | - | - |
| EFU C 40 and 50 | | - | - | 20 | 20 |
| x mini \square (mm) | | 140 | 140 | 220 | 220 |
| \varnothing (mm) | | 160 | 160 | 240 | 240 |

NB: to prevent noise transmission, do not brick the conduit into the chimney.

| Connect. \varnothing (mm) (mm) | Equivalent length (m) | | | |
|-------------------------------------|-----------------------|---------|-----------|----------|
| | 80 rigid | 80 flex | 110 rigid | 110 flex |
| 87° elbow | 1.9 | - | 2.0 | - |
| 45° elbow | 1.2 | - | 1.1 | - |
| Straight inspection pipe | 0.3 | 0.3 | - | 0.5 |
| Inspection T | 4.2 | - | 5.6 | - |
| Inspection elbow | 1.9 | - | 4.8 | - |

We also offer an optional terminal

Mitron for flex pipe (package DY926), in replacement of the terminal with flashing (see p. 95)

FUMI_E030

⇒ PPs flue systems accessories needed at the very least for connection to the chimney using rigid pipes in the boiler room and rigid or flex pipes in the chimney

| Description | Diagrams with Dimensions/References | | | | |
|---|-------------------------------------|--------------------|---------|-----------------|----------|
| | Boiler types | EFU C (E) 19 to 32 | | EFU C 40 AND 50 | |
| | | 80 rigid | 80 flex | 110 rigid | 110 flex |
| Chimney connection kit \varnothing 80 mm PPs rigid | DY717 84887717 | X | | | |
| Chimney connection kit \varnothing 110 mm PPs rigid | DY177 84887577 | | | X | |
| Chimney connection kit \varnothing 80 mm PPs flex | DY895 100015325 | | X | | |
| Chimney connection kit \varnothing 110 mm PPs flex | DY888 100015287 | | | | X |
| Sleeve \varnothing 124 mm | DY753 84887753 | X | X | X | X |
| Finishing plate \varnothing 80 mm | DY757 84887757 | X | X | | |
| Finishing plate \varnothing 110 mm | DY879 100010270 | | | X | X |
| Flex pipe \varnothing 80 mm Length 12.5 m (1) | DY897 100015327 | | X | | |
| Flex pipe \varnothing 110 mm Length 12.5 m (1) | DY889 100015288 | | | | X |

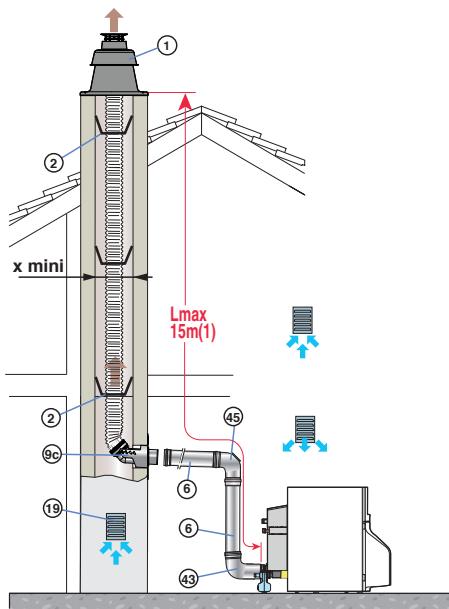

80 (I) Other flex pipe lengths available see page 95

⇒ Other flue systems accessories available, see pages 94 (PPs rigid), 95 (PPs flex) and 98 (common accessories)

NEOVO CONDENS

6 CONFIGURATION B_{23P} - CONNECTION TO A CHIMNEY USING PPs PIPES IN BOILER ROOM, SINGLE "RIGID" OR "FLEX" PPs PIPES IN CHIMNEY (COMBUSTIVE AIR TAKEN FROM THE BOILER ROOM)

With Quick-kit

We also offer an optional terminal Mitron for flex pipe (package DY926), in replacement of the terminal with flashing (see p. 95)

(II) For each additional metre of horizontal conduit, remove 1.2 m from the vertical length Lmax given in the table opposite

| Boiler types | \varnothing connect (mm) | Lmax (m) |
|-----------------------|----------------------------|------------|
| EFU C 19 to 32 | | 80 flex |
| EFU C E 19 to 32 | | 15 |
| x mini \square (mm) | | 15 |
| \varnothing (mm) | | 140 |
| | | 160 |

NB: to prevent noise transmission, do not brick the conduit into the chimney.

| Connect. \varnothing (mm) | Equivalent length (m) | 80 rigid | 80 flex |
|-----------------------------|-----------------------|----------|---------|
| 87° elbow | 1.9 | | - |
| 45° elbow | 1.2 | | - |
| Straight inspection pipe | 0.3 | 0.3 | |
| Inspection T | 4.2 | | - |
| Inspection elbow | 1.9 | | - |

⇨ PPs flue systems accessories needed at the very least for connection to the chimney using rigid pipes in the boiler room and rigid or flex pipes in the chimney

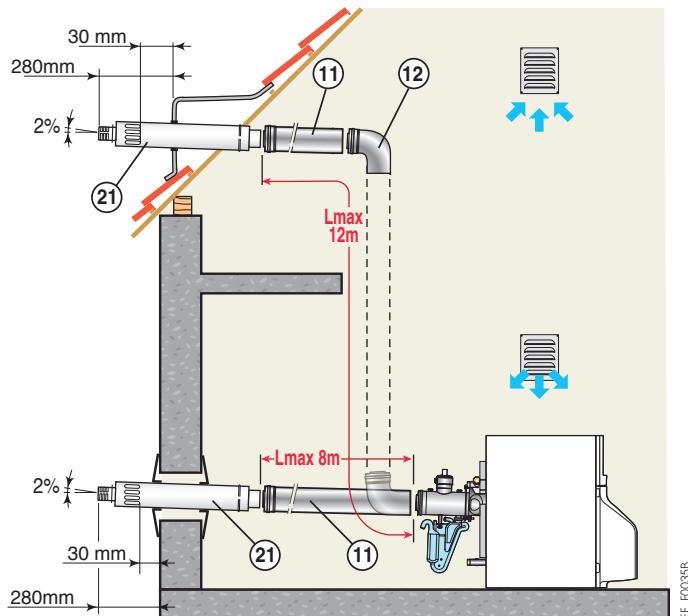

| Description | Diagrams with Dimensions/References | Boiler types | EFU C (E) 19 to 32 |
|--|-------------------------------------|-----------------------------|--------------------|
| | | \varnothing connect. (mm) | 80 flex |
| | | Package/Ref. | |

| Finishing plate \varnothing 80 mm | | DY757 84887757 | X |
| Flex pipe \varnothing 80 mm Length 12.5 m (1) | | DY897 100015327 | X |

(II) Other flex pipe lengths available see page 95

⇨ Other flue systems accessories available, see pages 94 (PPs rigid), 95 (PPs flex) and 98 (common accessories)

NEOVO ECO NOX

1 CONFIGURATION C_{13x} - CONCENTRIC HORIZONTAL FORCED FLUE STAINLESS STEEL/STAINLESS STEEL (CONNECTION TO AN EXTERNAL WALL OR A ROOF OUTLET)

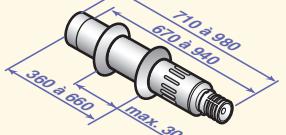

| Boiler types | \varnothing connect. (mm) | Lmax (m) |
|--------------|-----------------------------|----------|
| EFU.. FF | 12 (I) | 80/125 |
| EFU E.. FF | 12 (I) | |

(I) With a horizontal pipe not exceeding 8 m.

| Connect. \varnothing (mm) | Equivalent length (m) |
|-----------------------------|-----------------------|
| 80/125 | |
| 87° elbow | 1.3 |
| 45° elbow | 0.8 |
| Straight inspection pipe | 0.3 |
| Inspection elbow | 1.4 |

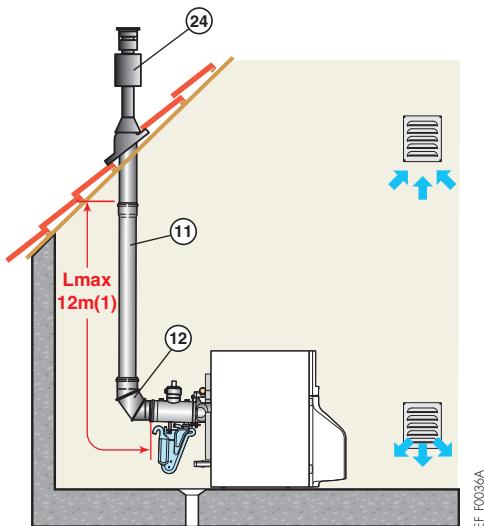

⇒ Stainless steel/Stainless steel accessories needed for connection at the very least for connection to a horizontal forced flue:

| Description | Diagrams with Dimensions/References | Boiler types | EFU (E).. FF HOR |
|---|---|-----------------------------|------------------|
| | | \varnothing connect. (mm) | 80/125 |
| | | Package/Ref. | |
| Horizontal forced flue standard \varnothing 80/125 mm |  ②1 | DB90 81998533 | X |

⇒ Other flue systems accessories available, see pages 97 (Stainless steel/Stainless steel) and 98 (common accessories)

NEOVO ECONOX

2 CONFIGURATION C_{33X} - CONCENTRIC VERTICAL FORCED FLUE STAINLESS STEEL/STAINLESS STEEL (CONNECTION TO SLOPING ROOF OR FLAT ROOF)

| Boiler types | \varnothing connect. (mm) | Lmax (m) |
|--------------|-----------------------------|----------|
| EFU.. FF | | 12 (1) |
| EFU E.. FF | | 12 (1) |

(1) For each additional metre of horizontal conduit, remove 1.2 m from the vertical length Lmax given in the table above.

| Connect. \varnothing (mm) | Equivalent length (m) |
|-----------------------------|-----------------------|
| 80/125 | 80/125 |
| 87° elbow | 1.3 |
| 45° elbow | 0.8 |
| Straight inspection pipe | 0.3 |
| Inspection elbow | 1.4 |

⇒ Stainless steel/Stainless steel accessories needed for connection to a vertical forced flue:

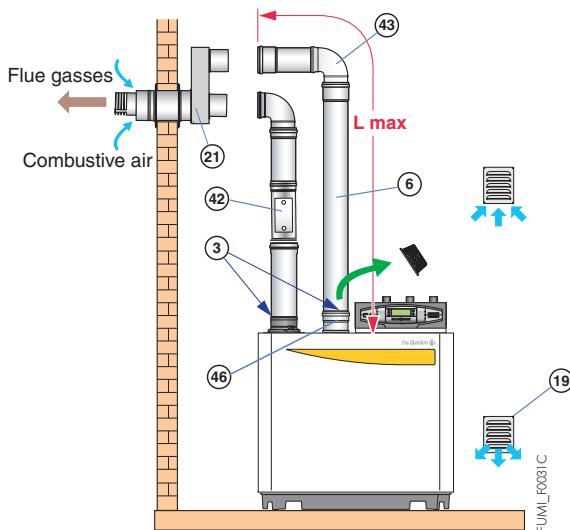

| Description | Diagrams with Dimensions/References | Boiler types | EFU (E).. FF VER |
|---|-------------------------------------|--|------------------|
| | | \varnothing connect. (mm) | 80/125 |
| Vertical air/flue gas terminal \varnothing 80/125 mm (black or red) | | DB91 81998534 (black) or DB89 81998543 (red) | X |
| 87° elbow | | DB96 81998539 | X |

⇒ Other flue systems accessories available, see pages 97 (Stainless steel/Stainless steel) and 98 (common accessories)

C 230 ECO

1 CONFIGURATION C₁₃ - CONCENTRIC HORIZONTAL FORCED FLUE ALU/GALVANIZED STEEL OR PPs/GALVANIZED STEEL (CONNECTION TO OUTSIDE WALL)

⚠ Configuration prohibited in building open to the public !

| Boiler types | Connect. Ø (mm) | Lmax (m) |
|--------------|-----------------|----------|
| C230-85 ECO | 150 or 160 | 50 |
| C230-130 ECO | | 37 |

C 230 ECO

7 CONFIGURATION B_{23P} - CONNECTION TO A CHIMNEY FOR CASCADE INSTALLATION (INSTALLATION WITH MOTORISED FLUE DAMPERS)

C210_F00018D

Maximum admissible length L (in m) depending on the Ø of the conduit D (in mm) for various "cascade" combinations
(These lengths have been defined in accordance with the dimensional constraints given in the above diagram. For different dimensional constraints, consult us).

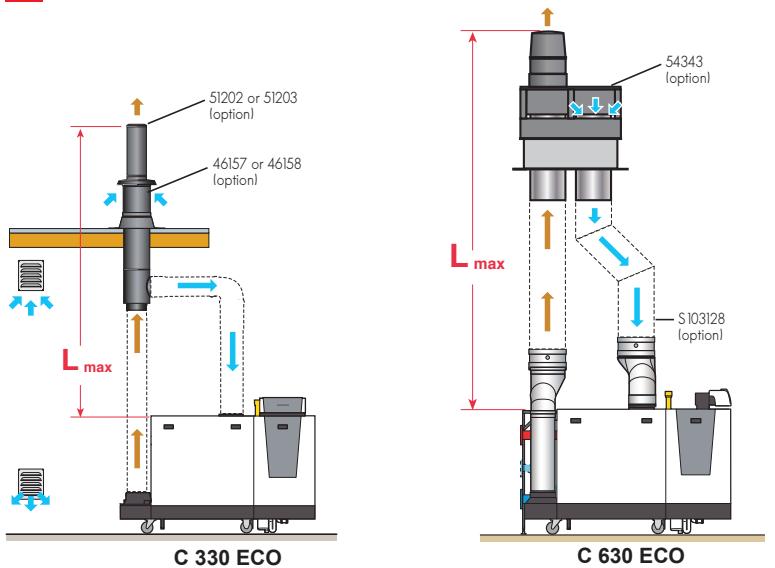

⇒ Options that must be ordered for configuration B_{23P} in the case of cascade installations

| Description | Dimensional diagrams | Package/ Reference | Comments |
|-----------------------|----------------------|----------------------------------|---|
| Motorised flue damper | | (49) GV24 100011033 | If a cascade is over pressurised, the installation of one flue damper per boiler prevents blow back of combustion products to the boilers that have been shut down. |

C 330 ECO/C 630 ECO
