

HEVAC DELIVERS PACKAGED PLANT ROOM TO OLIVER PLUNKETTS HOSPITAL

DESIGN, BUILD DELIVER...

PROJECT : PPR INSTALLATION

On May 27th 2014 Hevac Limited delivered their latest packaged plant room from Hevac's commercial & industrial division. The bespoke packaged plant room was designed, coordinated and fabricated by the Hevac engineers and fabricators.

Due to the tight deadline for this particular project, an offsite plant room production was the best solution allowing full store fit out to take place in tandem with outsourced plant room fabrication.

Following a principal design stage agreement and detail agreement by the client, the consultant and the package plant room (PPR) team, the packaged plant room went into full production. The 8 week process from sign off to site delivery is something that could not have been achieved on a normal construction site.

Aaron Brogan, Hevac PPR design engineer commented, "This is one of several packaged plant rooms we have supplied into the market and are delighted to be expanding our value product offering to the industry from design through to commissioning".

Hevac have the ability to offer full design, fabrication and delivery of packaged plant rooms nationwide. We have fully qualified, experienced engineers and auto-cad technicians who can design & generate bespoke CAD construction drawings and schematics for your approval prior to the commencement of construction.

Should this type of PPR application appeal to you, Hevac would be delighted to handle your enquiry. Please don't hesitate to contact us on 01-4191919 for your next project.

- Double skin panel Kingspan wall construction.
- Double louvered steel door.
- External dimensions of 5m x 2.5m.
- Built on a galvanized u-section.
