## Residential conventional flue

**PRV direct-fired water heaters are a cost effective solution for residential hot water demands. The units are equipped with a high efficient burner and baffle design that insures fast recovery times and economical hot water production. The range includes 3 models with storage capacities from 109 to 181 litres and heat inputs up to 18 kW.**

- Multi port stainless steel burner
- Piezo igniter
- Control & ECO thermostats
- Thermal reflux safety flue system (TRS)
- Electrolytic protection - magnesium anode
- Draft diverter
- LPG conversion kit
- Suitable for vented (open) or unvented (sealed) systems

#### *Optional accessories*

- Unvented system kit
- Solenoid control kit
- Temperature & pressure relief valve
