

Heat Control App

Flexible Energy Management

The World's First App for operating Industrial Heating Systems

Schwank
INNOVATIVE HEATING SOLUTIONS

Heat Control App - Your Advantages:

- Flexible control and programming of the heating
- Remote access
- Control via mobile phone
- Simple, self-explanatory user interface
- Secured access via intranet
- Free App
- Easy integration and connection to existing control system
- Individual setting of different user levels [password protected if desired]
- The world's first App for operating industrial heating systems

Extra Operating Comfort and Security

Using the Heat Control App by Schwank, you now have the flexibility to manage and control your heating system **from anywhere in the world.**

The only thing you need to do so is a mobile phone with internet access. With this App, even several control systems in one or more buildings may be integrated and assigned. Thus, you may also centrally control, monitor and check on buildings which are physically separated from each other.

Just by simply installing the App, it connects to the control system and establishes a secure connection.

Next to Schwank's ThermoControl+, a separate communication module is assembled and connected. The network integration into your company's intranet is simple and fast.

From then on, you as the operator of the control system may remotely set the heating parameters when and where you wish.

From the car, from the sofa, from everywhere!

Have you become curious? If so - just download the free App right here:
